I. LISTENING

1. free 2. pollution 3. electricity 4. sunny 5. installation

Nội dung bài nghe

Well, the benefits of this source of energy are obvious. First, solar energy is free and inexhaustible... at least until the sun runs out in billions of years. Second, solar power does not cause pollution. It is a really clean source of energy. Third, solar energy can be used to create electricity in remote areas. It is very expensive to get electricity lines there.

However, the problem is that solar power can only be produced during the daytime and when it is sunny. So in countries like the UK, solar energy can be an unreliable source. Moreover, the cost of installation is not low at all.

Hi Alice,

It was great to hear from you. I'm preparing to attend the annual Flower Festival in Da Lat. It often takes place in December or January for local people and visitors to enjoy the Christmas and New Year atmosphere. As its name, the

festival is always full of extremely beautiful flowers and other special plants on display. What I like best is the appearance of popular singers and movie stars.

Everything and everyone is charming. Hope you can join me some day.

Write soon.
